

Health and Safety Policy Statement

Our statement of general policy is:

To maintain a Health and Safety Management System that:

- provides adequate control of the health and safety risks arising from our work activities;
- provides consultation with our employees and site visitors on matters affecting their health and safety;
- provides and maintains safe plant and equipment;
- provides safe handling and use of substances in accordance with COSHH regulations;
- provides information, instruction and supervision for employees;
- ensures all employees are competent to undertake their tasks, and where required to give them adequate training;
- prevents accidents and cases of work related ill-health;
- enables the company to maintain safe and healthy working conditions;
- enables compliance audits in accordance with an agreed timetable to ensure procedures are effective and supported
- enables the review and revision of this policy as necessary at regular intervals based on an annual review of the Health and Safety Management System.
- ensures compliance with any external certification body requirements
- enables the maintaining of adequate training records, demonstrating compliance with any legislative requirements and to ensure such are maintained up to date
